Codificación

Hacer que el molino rote a una potencia de 5.

Girar en dirección a las agujas del reloj durante 2 segundos.

Parar motor

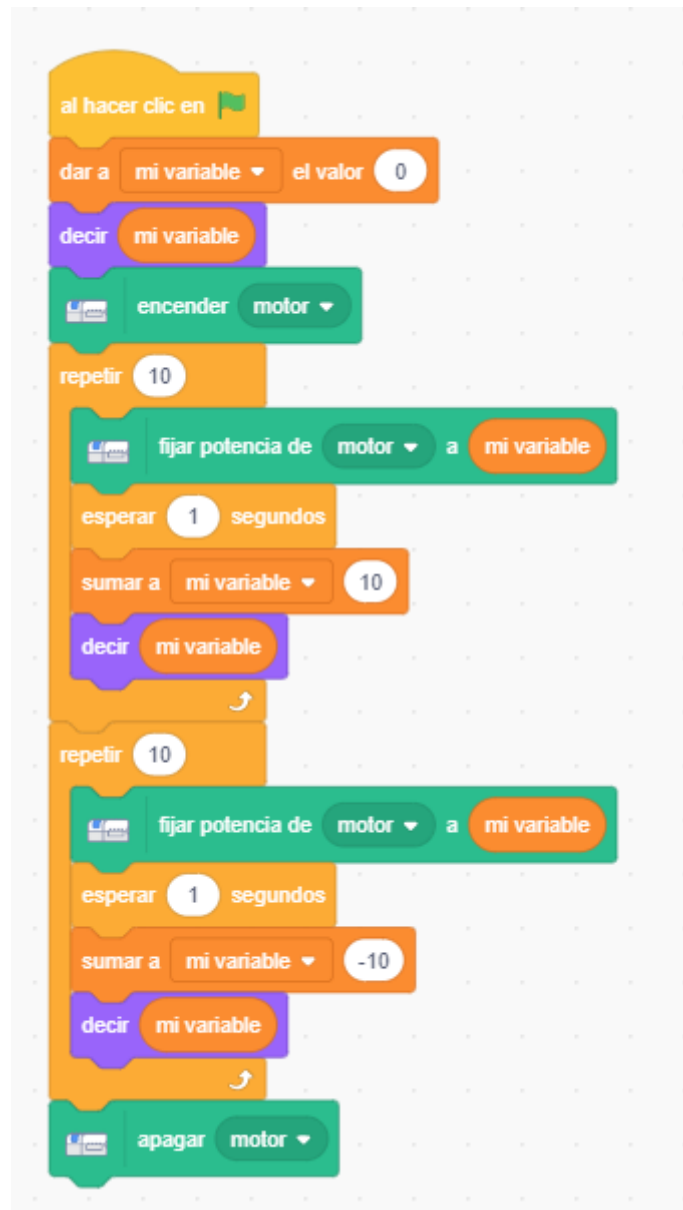

Girar en dirección contrarias a las agujas del reloj durante 2 segundos.

Parar motor.

Para los más avanzados.

Utilizando bucles y un contador hacer como se acelera de 0 a 100 con un incremento de 10 y luego se desacelera de 100 a 0 con un decremento de 10.

Mientras nuestro gato muestra la potencia por pantalla.
