Codificación

En este primer programa vamos a realizar que nuestro robot se adelante unos centímetros de detenga y luego retroceda los mismos centímetros.

Potencia de 3

Giro dirección agujas del reloj.

Recorrido durante 2 segundos y parar.

Esperar 1 segundo.

Giro dirección contraria a las agujas del reloj.

Recorrido durante 2 segundos y parar.

En este capítulo para avanzados, queremos que el robot se mueva hacia delante y hacia atrás cuando el ruido ambiente sea 5, 6 o 7.

Si el ruido ambiente es 1, 2, 3 o 4 el robot ha de permanecer quieto.
